

8 models available to meet your different needs

How the Cloud-based LED poster gives your business the winning edge?

The key value a Cloud based LED poster can provide is that you can cost-effectively keep your customers informed in a timely manner. It is now so called "the 5th media" along with TV, radio, newspaper and the Internet by the industry.

- Choosing right physical spots for your LED poster deployment! Let it be seen from the crowd.
- Plan your content based on your marketing strategy. Use your imagination to get the best visual and text message out quickly.
- Optimize your scheduling on your playlist so you can fully leverage your Cloud based LED poster to make the content more meaningful.
- Try to get feedbacks from your customers to understand their impression of the content. Find a way to improve your content design.
- Consider to use a third party service provider for your content design if you are too busy.

Who We Are

About Us

Leader LED Display Solutions is a digital signage solution provider. We specialize in Cloud-based LED display products and services. Our goal is to help our customers leveraging modern, cost effective LED digital signage solution to promote their branding, enhance their marketing efforts and increase their sales.
